

Practical-7 Creating and running virtual machines on Bare-Metal Hypervisors Type 0

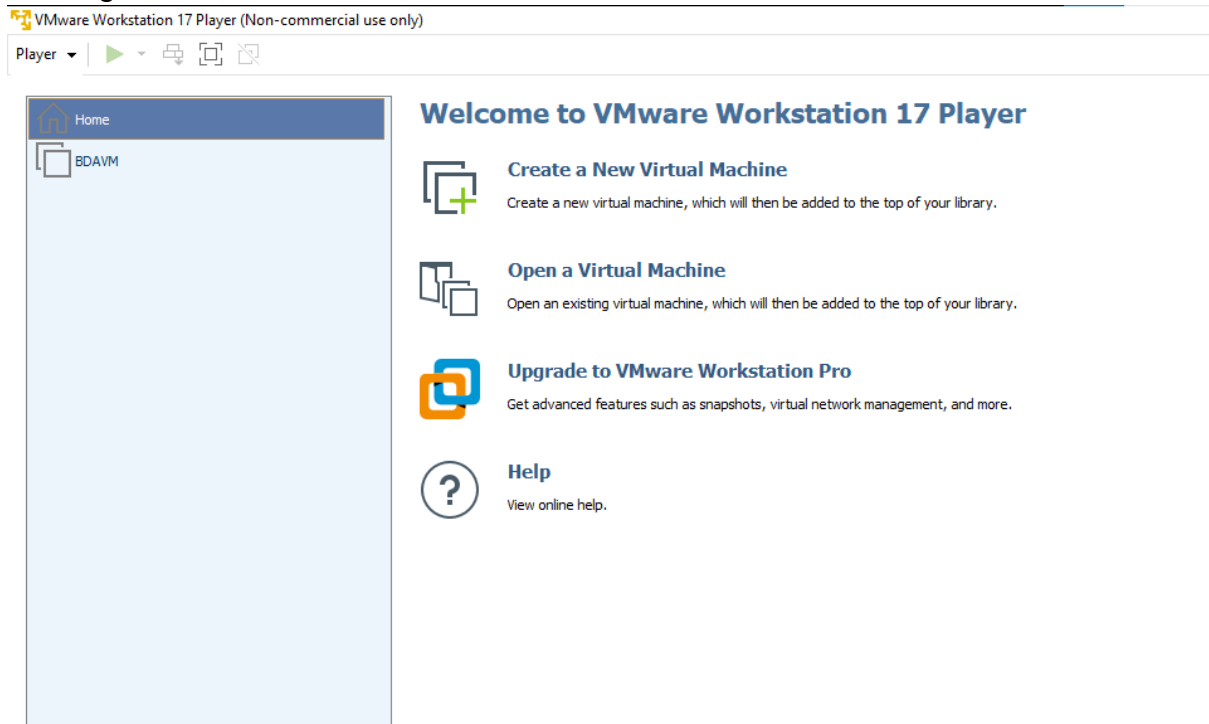

Name: Anshika Sharma

SAP ID: 86062300034

Roll No: A061

For Ubuntu:

1. Navigate to VMware workstation and click on '**create a new virtual machine**'.

2. Click on the **Browse** button and upload the downloaded **ubuntu** file.

Welcome to VMware Workstation 17 Player

Create a New Virtual Machine

Create a new virtual machine, which will then be added to the top of your library.

Open a Virtual Machine

Open an existing virtual machine, which will then be added to the top of your library.

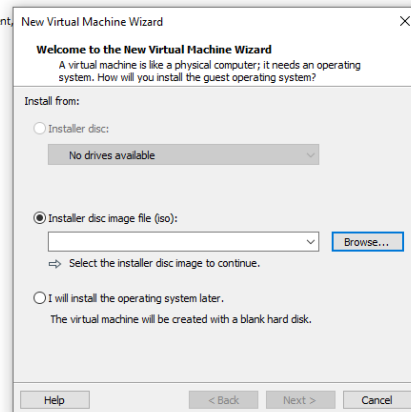

Upgrade to VMware Workstation Pro

Get advanced features such as snapshots, virtual network management,

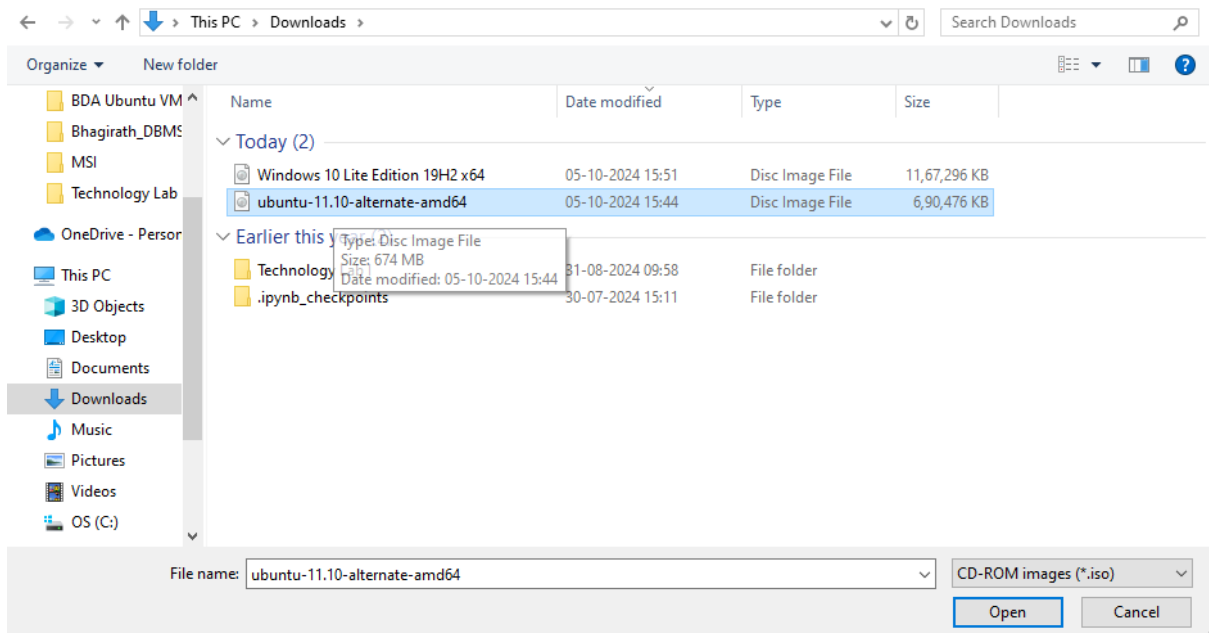

Help

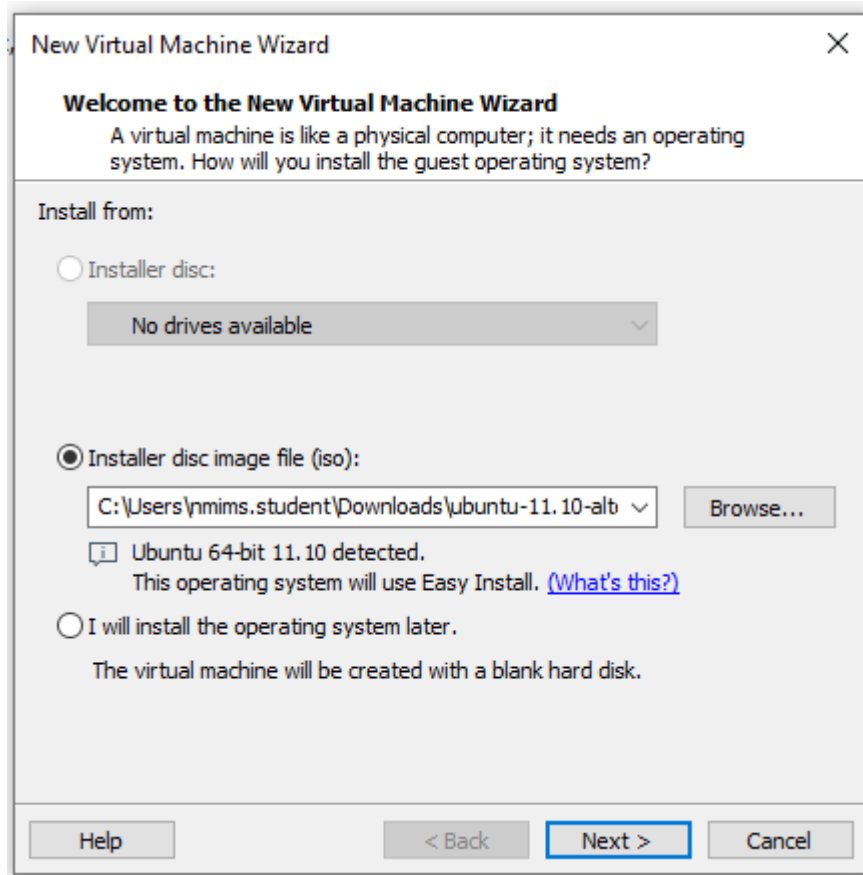

View online help.

Browse for ISO Image

3. Click on **next** button.

New Virtual Machine Wizard

Welcome to the New Virtual Machine Wizard
A virtual machine is like a physical computer; it needs an operating system. How will you install the guest operating system?

Install from:

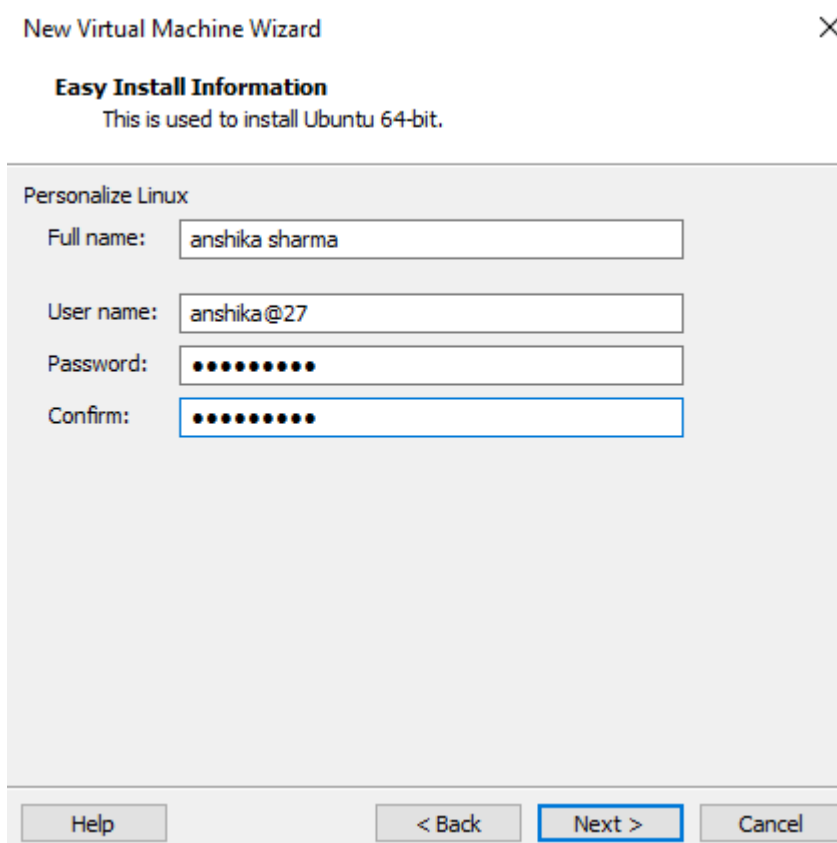

☐ Installer disc:
No drives available

☒ Installer disc image file (iso):
C:\Users\nmims.student\Downloads\ubuntu-11.10-alb Browse...
Ubuntu 64-bit 11.10 detected.
This operating system will use Easy Install. [\(What's this?\)](#)

☐ I will install the operating system later.
The virtual machine will be created with a blank hard disk.

Password: ●●●●●●●●

Confirm: ●●●●●●●●

Help < Back Next > Cancel

5. Click on **next** button and finally press the **finish** button.

The screenshot shows the 'New Virtual Machine Wizard' dialog box, titled 'New Virtual Machine Wizard'. The main heading is 'Name the Virtual Machine', followed by the question 'What name would you like to use for this virtual machine?'. Below this, there are two input fields: 'Virtual machine name:' with the text 'Ubuntu 64-bit' entered, and 'Location:' with the path 'C:\Users\nmims.student\Documents\Virtual Machines\Ubuntu 64' entered. To the right of the location field is a 'Browse...' button. At the bottom of the dialog, there are three buttons: '< Back', 'Next >', and 'Cancel'. The 'Next >' button is highlighted with a blue border.

The screenshot shows the 'New Virtual Machine Wizard' dialog box, titled 'New Virtual Machine Wizard'. The main heading is 'Ready to Create Virtual Machine', followed by the instruction 'Click Finish to create the virtual machine and start installing Ubuntu 64-bit and then VMware Tools.'. Below this, it states 'The virtual machine will be created with the following settings:'. A list of settings is displayed in a scrollable area:

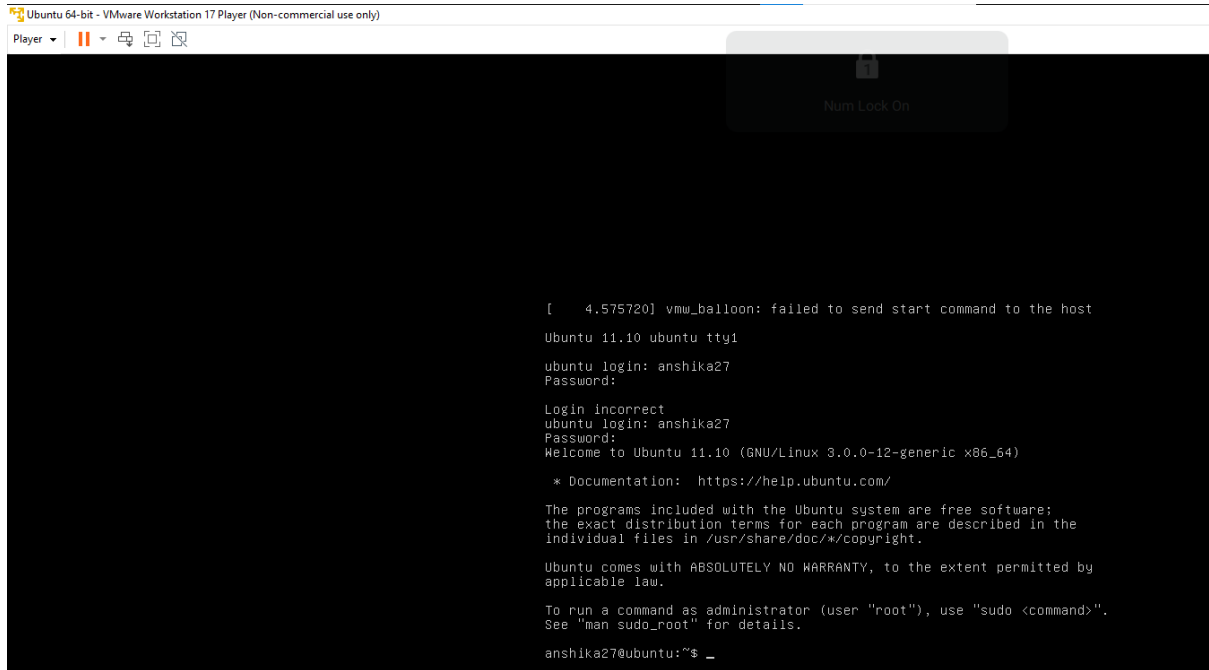

Name:	Ubuntu 64-bit
Location:	C:\Users\nmims.student\Documents\Virtual Machines...
Version:	Workstation 17.x
Operating System:	Ubuntu 64-bit
Hard Disk:	20 GB, Split
Memory:	2048 MB
Network Adapter:	NAT
Other Devices:	2 CPU cores, CD/DVD, USB Controller, Printer, Sound...

Below the settings list is a 'Customize Hardware...' button. At the bottom of the dialog, there is a checkbox labeled 'Power on this virtual machine after creation' which is checked. At the very bottom, there are three buttons: '< Back', 'Finish', and 'Cancel'. The 'Finish' button is highlighted with a blue border.

6. The below interface appears .

7. The interface prompts for **username** and password. Input the username and password that you kept before.

```

For Windows:

1.Navigate to VMware workstation and click on ‘create a new virtual machine’.

2.Click on the **Browse** button and upload the downloaded **windows** file.

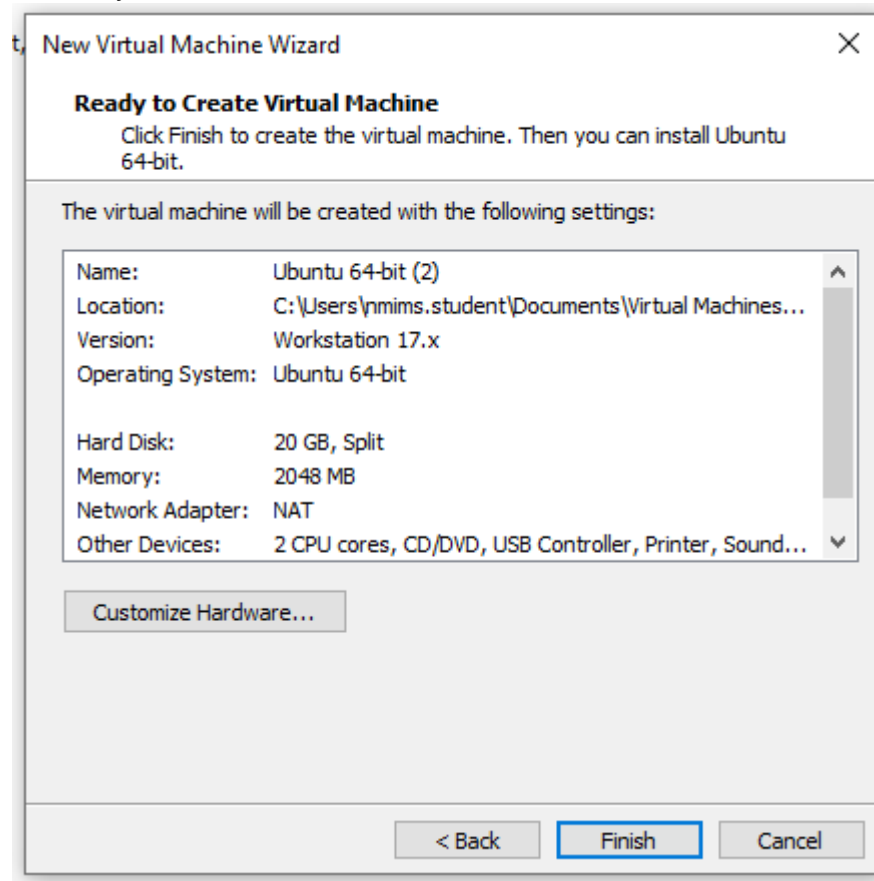

3.Click on **next** button.

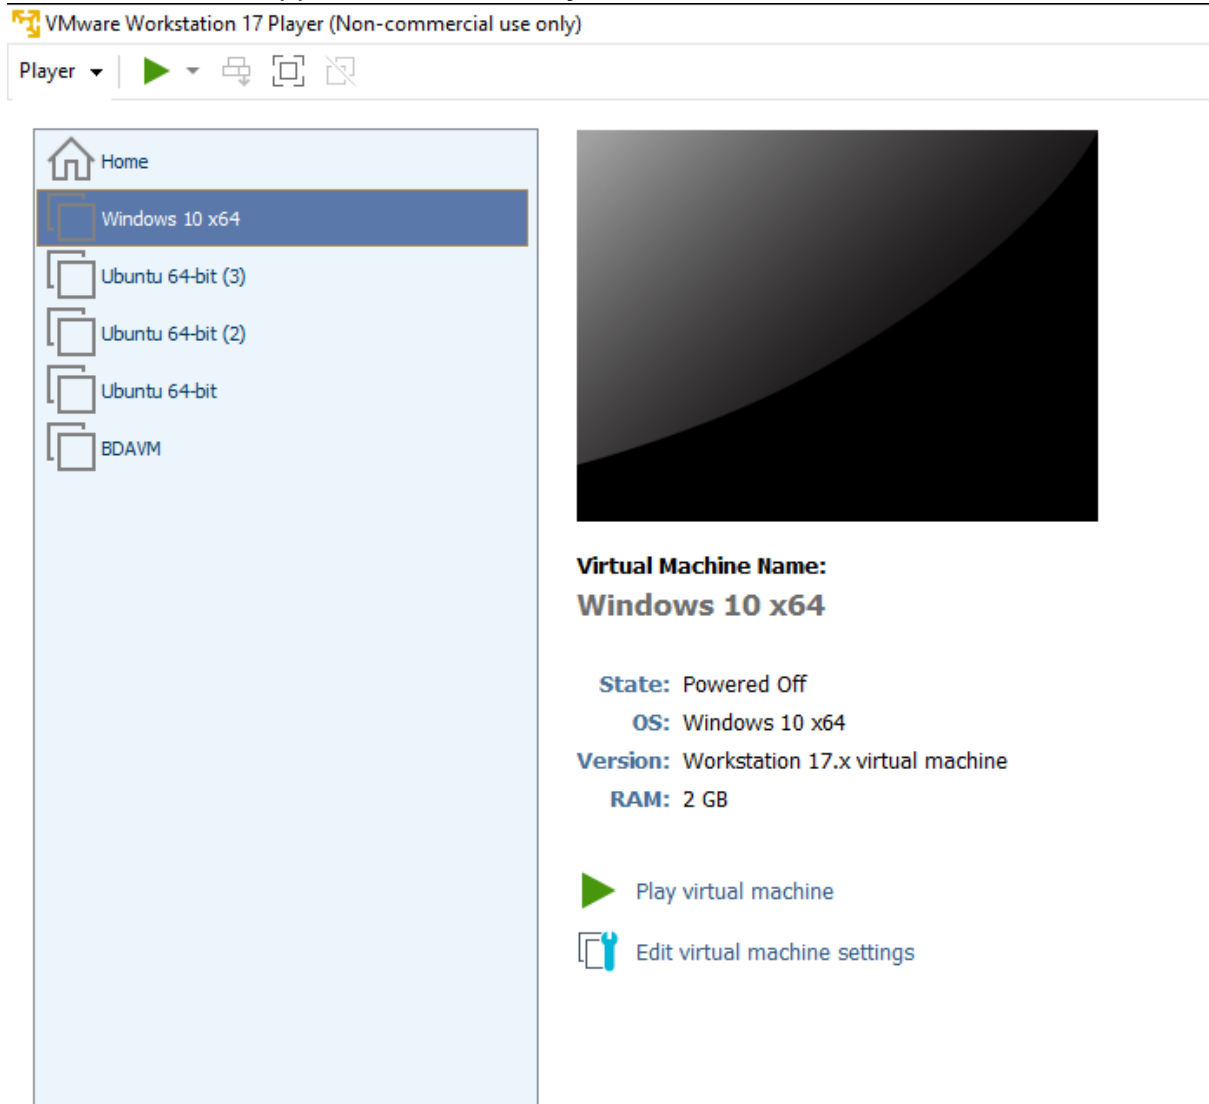

4. Select **Microsoft Windows** and click **next**.

5. Finally click on **finish** button.

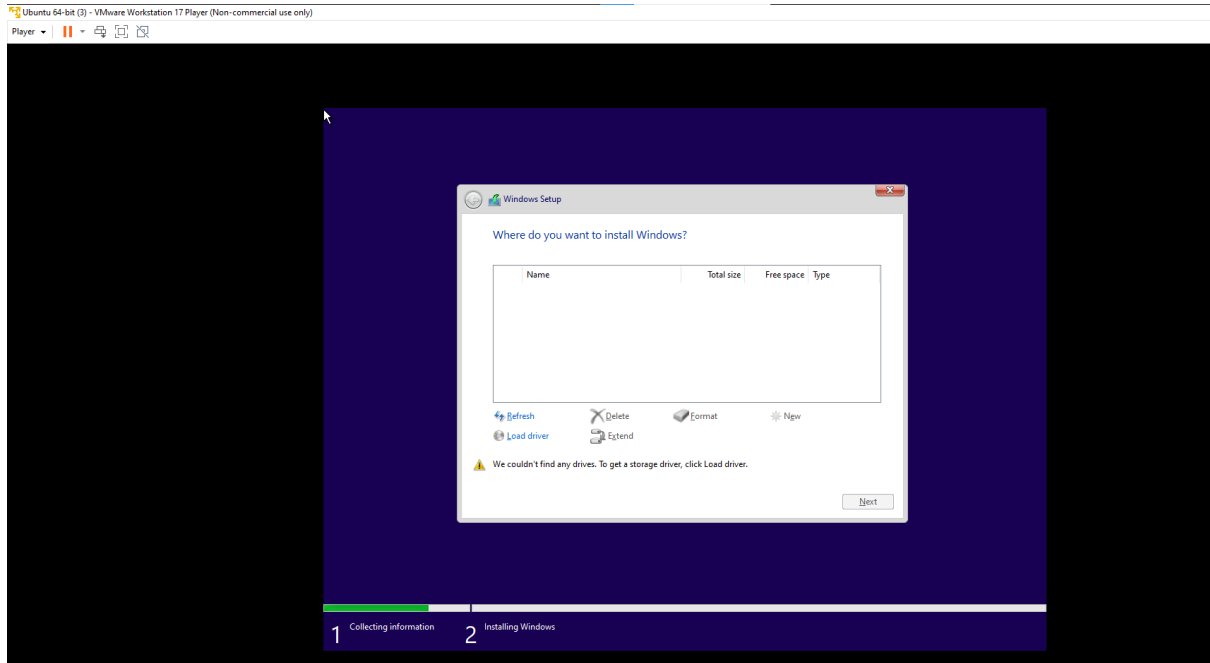

6. Below interface appears. Click on **Play virtual machine**.

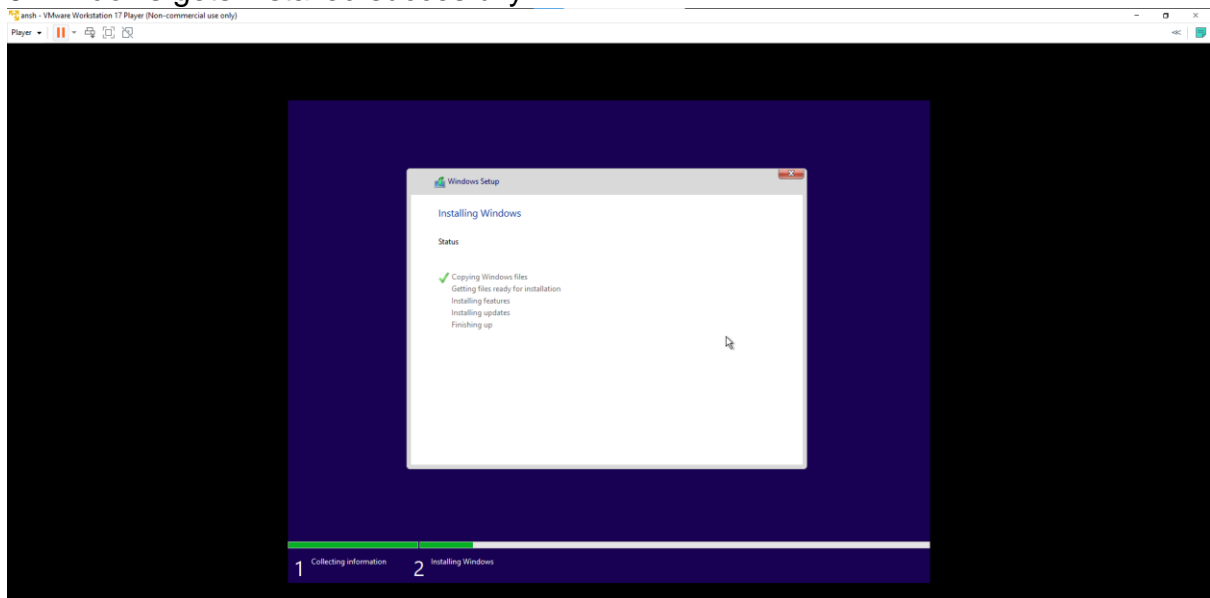

7. The Setup begins.

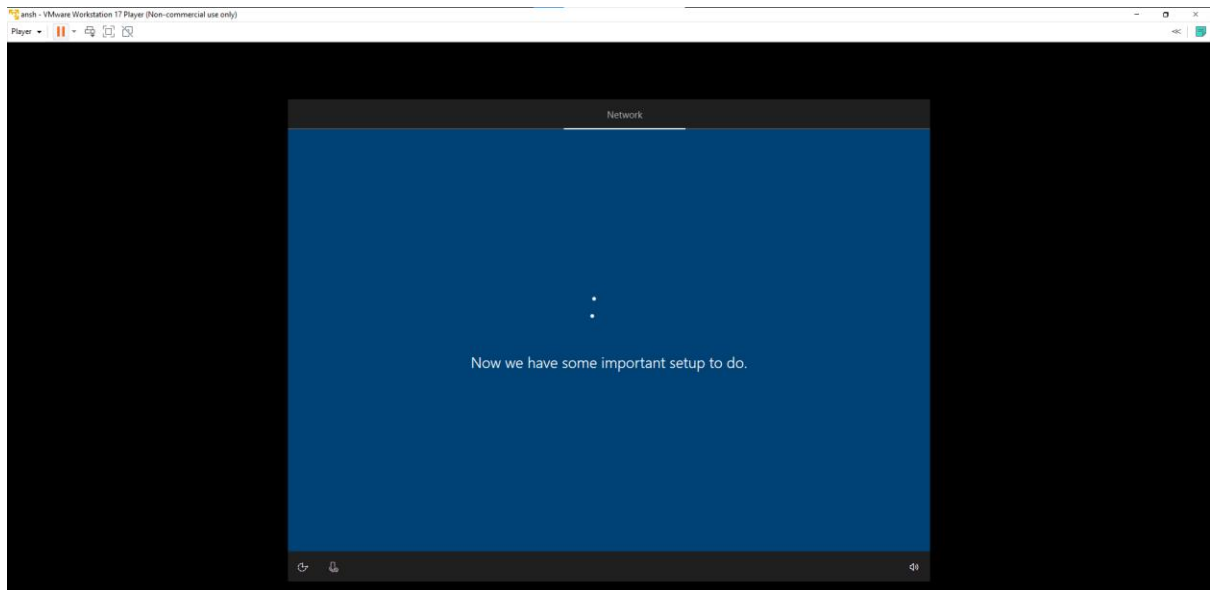

8. Click on **next** button.

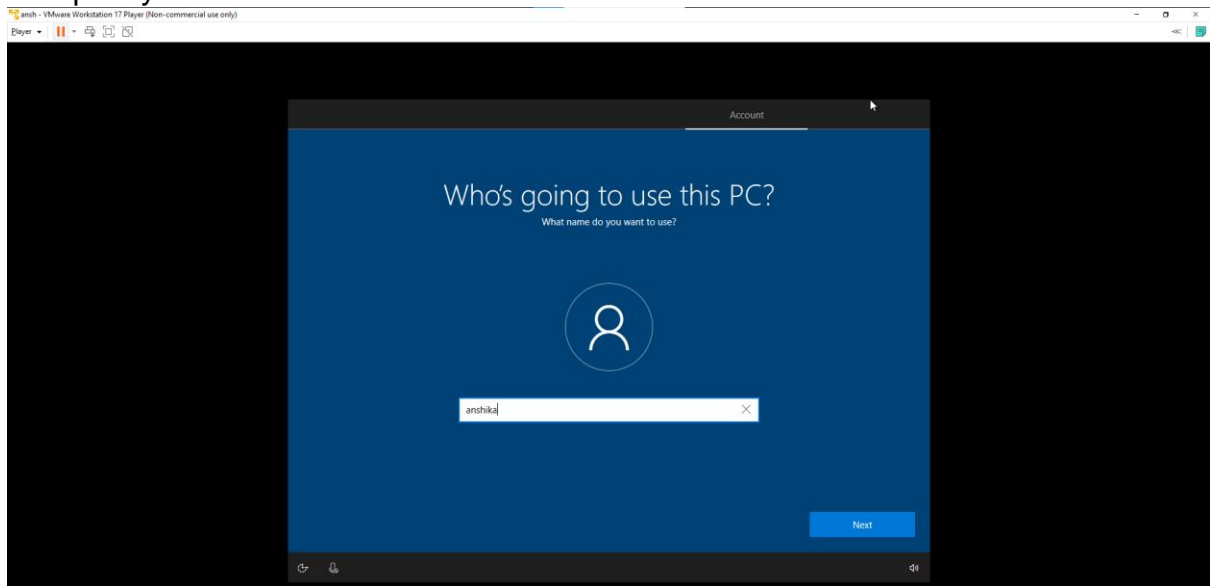

9.Windows gets installed succesfully.

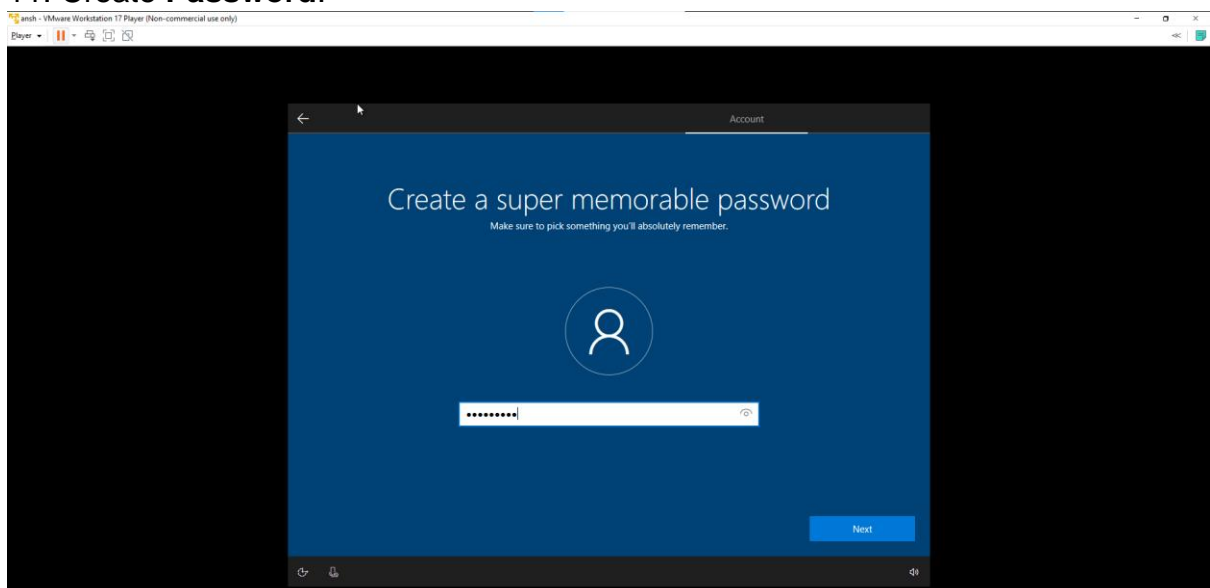

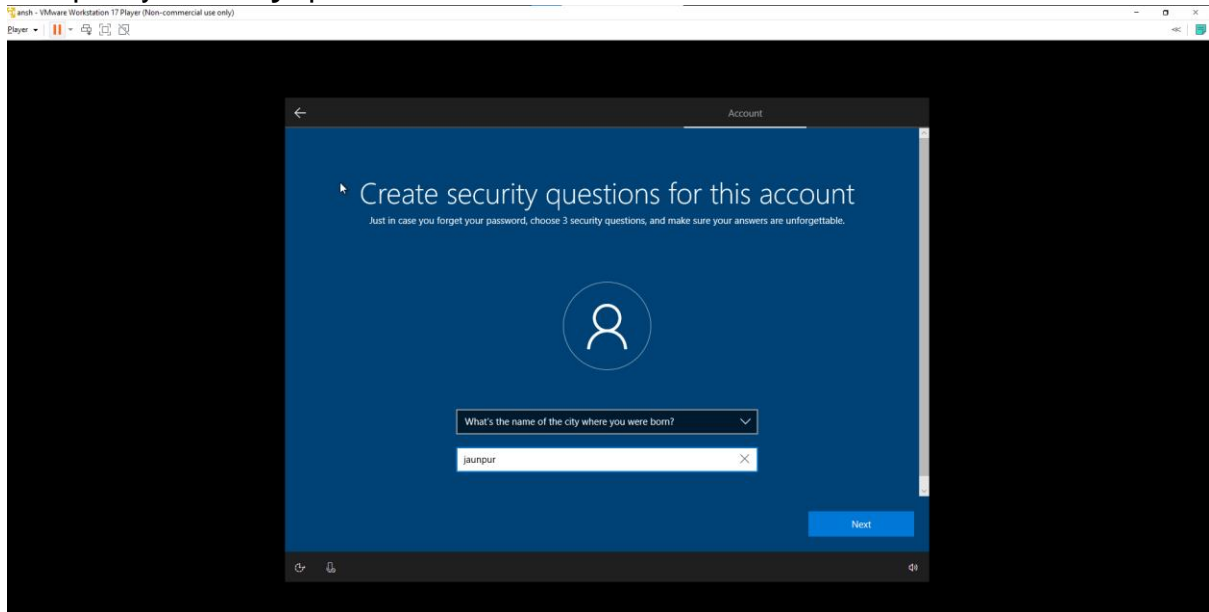

10. Specify the name of the user.

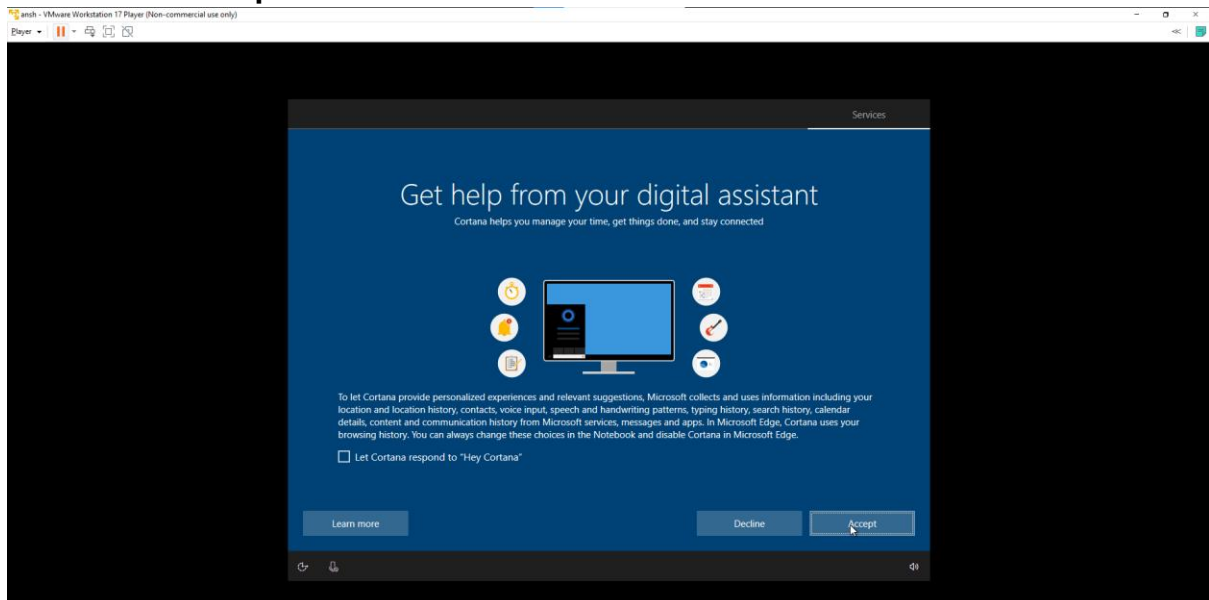

11. Create **Password**.

12. Specify **security** questions.

13. Click on **accept**.

14. Your windows setup is completed.

15. Now, this is your virtual machine. You can use any apps.
